Sun Java Technology Evangelist

Tec Talk:

November, 30th 2007

6.00 pm doors open
6.20 pm welcome
6.30 pm Talk 1 and Q&A
7.30 pm break
7.45 pm Talk 2 and Q&A
8.45 pm Q&A „ask the evangelists“
9.00 pm discussion in public bars

Speaker: **Carol McDonald** and **Joey Shen**

Examining a sample application built in three different ways
Java SE trouble shooting tools in a nutshell

Talk 1 Carol McDonald, Sun Java Technology Evangelist: Examining a sample Application built 3 different ways:

- 1) with JavaServer Faces, EJB 3.0 and the Java Persistence API,
- 2) Spring 2.0, JPA, and JSF
- 3) JBoss Seam

This talk will explain the implementation of a sample Online Catalog Application using JavaServer Faces, EJB 3.0 and the Java Persistence API. Then we will discuss the same application implemented using Spring 2.0, JPA, and JSF, and Finally we will look at the same application using Seam.

Talk 2 Joey Shen, Sun Java Technology Evangelist: Did your Java application ever crash? Did it ever become very slow after running for several days? Sometimes Java is not that obvious at showing what the problem is. Java SE 6 integrates various of convenient tools to help you to inspect your Java application and find out the problems. This session will show case how to address crashes, memory leaks, deadlocks in Java program by using the tools available in Java SE 6 such as jhat, jmap, dtrace, netbeans profiler.....
