

JUG Cologne

Java User Group (Cologne|Köln)

Next event: Wednesday,

09/06/2006

6.30 Doors open • 7.00 Start

9.00 Chillout

Speaker: Mike Aizatsky, JetBrains Inc.

Language: English

Topic: IDEA 6.0

Part 1: „Extending Java type system with annotations - IDEA way“

While sound scary, the topic is about annotations, IDEA makes special treatment about: @Nonnull, @NotNull, @Nullable. The first one helps developers localize their application, the other two gets rid of NPEs. Mike will talk about general theory, how IDEA treats them together with best practices for these annotations which are used at JetBrains.

Part 2: „JEE features“

Here Mike will talk about various enhancements for J2EE JetBrains has implemented in IDEA 6.0. This includes, but not limits: EJB3, assisted EJB2 -> 3 migration, JSF support, GWT support, Javascript enhancements, etc.

Mike Aizatsky is a Project Manager at JetBrains Inc., the world-famous vendor of IntelliJ IDEA Java IDE. Having 8 years of experience in Java development, he is currently leading the Web and Enterprise Development Department of IntelliJ IDEA project. Mike is working in St. Petersburg, Russia.

Location: University of Cologne, auditorium 3 of the physical institutes (Hörsaal III der Physikalischen Institute). Travel information on <http://jugcologne.org>

kindly supported by Professor Dr. Ewald Speckenmeyer, [Institut für Informatik](#), Universität zu Köln, and:

O'REILLY®
